In a public space, it is not common to carry a chair with you. It is not common to keep it in a locker either. But if a public space is converted to an art space, then you can expect the uncommon/abnormal. We create an encounter of a converted piece with a converted space.

You will receive the THONET chair in a box with the same size of X-CUBE© locker system box. So you will see how we want the converted chair to be installed into the locker. You will need to take it out of the box, but no assembly is necessary. All pieces will be signed by :mentalkLINIK.

Best  
yasemin
